**Engineering Solutions**

# Industrial Ducting Systems — Product range

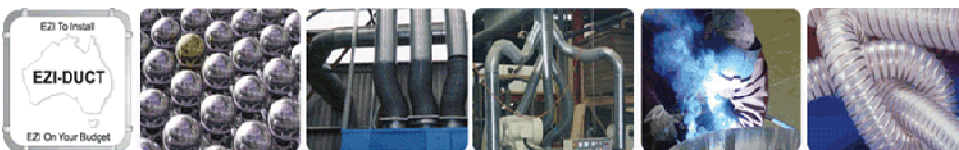

## Ducting Range

- Round
- Square
- Rectangular
- Oval
- Mild steel
- Stainless steel
- FRP
- Heavy gauge
- Light gauge
- Clip lock style
- Spiral lock form construction
- Welded construction
- Flexible ducting
- Fittings

## Ducting options

- Duct supports
- Clamp flanges
- Bolted flanges
- Painting
- Galvanizing
- Lagging and cladding
- Wear linings
- Structural FEA

**Quality products — Durable — Cost effective**

## Suitable Applications

- Mining
- Agriculture
- Food Industry
- Foundry
- Recycling
- Timber
- Minerals Processing

## HVAC Design

HVAC has the capacity to design, build and install complex ducting routes. HVAC engineers have experience to ensure quality is not compromised with the most difficult installations. HVAC has its own sheet metal-work shop with qualified tradesmen that are able to fit ducting to most equipment and buildings.

## HVAC meet industry needs

HVAC have the capability to design supply and install all types of ducting to meet specific customers needs.

## HVAC Facilities

Our facilities are based in the western suburbs of Brisbane and includes 6,000 m<sup>2</sup> of under-hook fabrication area. HVAC supply duct to the whole east coast.

HVAC are ISO9001:2008 certified and maintain high standards of safety, environmental and quality control.

## Other HVAC capabilities

- Commercial Heating Ventilation and Air Conditioning
- General steel fabrication
- Process services
- Telecommunications and base stations
- Electrical services
- Dust collectors

**HVAC ducting has been proven to survive the harshest environments**
