# Dust collectors — Product range

## Enviro-Jet

The Enviro-Jet dust collector has been specially designed by HVAC to the highest standard, adding modern features that improve reliability and the ease of maintenance. This range of dust collector is available in as a heavy duty solution and can be fitted with any style of filter. This includes the standard round filter bag to the new extended surface filter bag. Enviro-Jet dust collectors are ideally suited for process applications and provide ventilation in accordance with Occupational Health and Safety requirements.

## Jet-Set

The Jet-Set range is a robust dust collector with proven design principles based on a well known range from Germany. The filter sizes suit small to medium range applications typically 4400 m<sup>3</sup>/hr [2500 cfm] – 22,600 m<sup>3</sup>/hr [13,000 cfm]. They are ideally suited for small to medium dust loads and cater for dust types from all industries.

## Jet-Row

The Jet-Row is similar to the Jet Set range although it suites larger applications. It is a robust dust collector with proven design principles based on a well known range from Germany. The filter sizes range of from medium to high, typically 6000 m<sup>3</sup>/hr [3400 cfm] – 158,000 m<sup>3</sup>/hr [92,000 cfm]. They are ideally suited for medium to high dust loads and cater for dust types from all industries.

Call HVAC for additional information on which dust collector will best suit your application

## Suitable Applications

- Mining
- Agriculture
- Food Industry
- Foundry
- Recycling
- Timber
- Minerals Processing

## HVAC Design

HVAC Dust Collectors are made to the highest standards and are based on proven German design. HVAC are able to provide a complete solution that is versatile and can accommodate the needs of your business. HVAC follows strict protocols from design through to manufacture and installation – guaranteeing premium quality.

## HVAC meet industry needs

HVAC will assist in the design process to achieve the best product to meet specific requirements.

## HVAC Facilities

HVAC facilities are based in the Western suburbs of Brisbane and supply products to the whole East coast. Services include design supply and installation.

## Other HVAC capabilities

- Commercial Heating Ventilating and Air Conditioning
- General steel fabrication
- Process services
- Telecommunications and base stations
- Electrical services
- Industrial duct systems
