

HVAC

Industrial Hoppers

Engineering Solutions

Hoppers — Product range

Demountable sludge hopper

HVAC have a range of portable hoppers that are mounted on skids for easy deployment. These hoppers have a capacity of 20tonne to 50tonne

Drive under sludge hopper

HVAC drive under hoppers have a watertight clamshell door and can be manufactured to meet customer specifications. These hoppers have a capacity from 50tonne to 100tonne

Fixed hopper

HVAC fixed hoppers have a capacity from 100tonne and above. Fixed hoppers can be fitted with conveyors or other options.

General Purpose (GP) hopper

HVAC can manufacture a range of bins and hoppers to meet a customers requirement in function, shape, size and capacity.

Fish hopper

HVAC manufacture fish hoppers, built to customer specification. These can be manufactured in galvanised steel, carbon steel or stainless steel. These systems are generally fitted with a mechanical gate mechanism.

Suitable Applications

- Mining
- Agriculture
- Food industry
- Foundry
- Recycling
- Timber
- Minerals processing
- Water

HVAC Design

HVAC's high quality hoppers have become the industry standard. HVAC's design has been proven in the harshest of environments, it is versatile and its flexible design accommodates customer requirements.

HVAC Facilities

Our facilities are based in the Western suburbs of Brisbane and we supply products to the whole East coast. Services include design, supply and installation.

Hopper Options

The following options can be fitted to any of the HVAC hoppers

- Winch gate
- Screw conveyer
- Trimming screws
- Level indicators
- Access ladders and platforms
- Covers

All hoppers can be manufactured in galvanised carbon, stainless steel or a combination of both.

Other HVAC capabilities

- Commercial Heating, Ventilation and Air Conditioning
- General steel fabrication
- Process services
- Telecommunications and base stations
- Electrical services
- Air-pollution control

HVAC

hoppers are built to last.
